

Women's Athletic Association Intramural Ice Hockey Players, 1916-1932

The following is a collection of the photographs and names of the 149 ice hockey players we were able to identify, alphabetically by their maiden names. These women were all involved in ice hockey for at least one year during their time at the University. In all years, it is mostly the names of the women who made tournament teams, and in some years we have only the name of the woman who headed the sport or the captains of the teams, so we know for certain that this list is incomplete, but it is a start. Research files on the women listed are available at the Dakota County Historical Society when information could be traced.

Whenever possible, their photos are drawn from their class yearbooks, and class/matriculation dates were verified via yearbook or commencement program, or if unknown were extrapolated from activity dates (best guesses are marked with a ?). When not possible, we prioritized high school yearbooks photos, and then newspaper photos. We have included their surnames after marriage, if known, in italics, and women who verifiably never married are marked with an asterisk. The 30 women who were selected for, or played in, the 1917 Tournament are marked with a banner.
